

I'm not robot!

Metal roof sheet size. Most common metal roofing material. Sheet metal roofing salary. Sheet metal for roofing near me. How much is metal roofing a sheet.

Corrugated roof sheets Galvanised are among the world's most popular metal roofing products due to their high quality and versatility. These corrugated iron roofing panels are suitable for traditional and contemporary roofing projects alike. It is long, wide, strong, lightweight and has an economical profile which can be quickly and easily aligned. These features alone will deliver you a steel roof that offers outstanding value! One of the most durable, long-lasting roofing materials available and it's virtually maintenance-free. Made from hi-tensile steel this profile whilst strong is also lightweight which minimises sheet damage. Can be used in both roofing and walling applications and the wide cover (762mm) allows for quick installation, saving on both materials and labor. This versatile profile can be used on a minimum roof pitch of 5 degrees. Corrugated sheeting is pierce fixed which ensures easy fixing by the conventional method. To ensure maximum weather protection our Corrugated has a 1.5 rib overlap. How can we help? Email us HERE or call us on 1300 886 944. Skip to content Shopping Cart Showing the single result £10.18 Corrugated roof sheets (also known as roof cladding) has been installed on buildings for many years and, due to its very easy installation process and excellent protective qualities, it still proves incredibly popular today. Alternatively, you can take advantage of filling out our quick and simple online contact form and we will get in touch as soon as possible. Galvanized steel panels arrive on-site, ready to be installed. The widespread availability and ease of access to materials paired with minimal preparation make galvanized roofing panels a more economical choice, especially when compared to other treated metals. But the lower cost isn't the only benefit of choosing galvanized roofing panels. You can also expect long-lasting durability. The galvanized coating extends the life of the already durable steel panels for roofs that easily last more than 50 years. Galvanized steel is a versatile building material, with widespread applications in agriculture, energy, telecommunications, and even residential buildings. Home and building owners prefer the low-maintenance durability of galvanized panels that are treated to resist rust. And with the increased focus on creating more sustainable buildings, galvanized roofing panels are an easy choice for environmentally-friendly building materials. Galvanized metal roof panels are easy to customize with dozens of color options and styles that range from the look of a traditional metal roof to something a little more modern and architecturally pleasing. But hands down, many home and building owners are turning to galvanized roofing as a cost-effective and sustainable option that saves money up front and over the long haul with lower energy usage and less maintenance. Roofing Panels from Metal Sales Metal Sales is the leading manufacturer of metal roofing products in the US. We have more than 55 years of experience in providing the construction industry with high-quality, sustainable building materials for roofing, walls, and buildings systems. We offer a wide selection of colors and styles to customize the look of any project. At Metal Sales, we make it easy to get the green building certifications that matter most. From product inception to the final delivery, we're committed to creating sustainable building materials that integrate architectural strategies and technology to maximize energy efficiency. Our innovative and environmentally-friendly metal roofing panels are a great choice for agricultural, commercial, and residential applications. We provide low-maintenance, cost-effective roofing solutions that are easy to install and look great for decades. When accounting for the necessary overlap, these roofing sheets have a total cover width of 990mm (0.99m/3.2ft). Whether you're reviving a storage facility or building a new stable, our galvanised corrugated roofing sheets could be the ideal solution. Formed into an iconic, traditional roof sheet profile, they're crafted from hot-dipped galvanised steel which will provide superb durability for years to come. Featuring 14 3-inch round corrugations, these galvanised sheets are both strong and cost-effective. These galvanised roofing sheets are available in both 0.5mm and 0.7mm thicknesses. Providing 990mm of coverage once lapped, they can be cut-to-size at 100mm increments to minimise wastage for your next project. This makes these galvanised sheets a truly customisable option that will save you both time and money in labour costs. Our customers favour these galvanised corrugated roofing sheets when rejuvenating or constructing both commercial and agricultural buildings. These projects include stables, livestock storage, warehouses and more. These sheets can also be used to bolster existing roof spaces for greater levels of thermal insulation. Galvanised roofing sheets of this kind can be installed on roofs with pitches as low as 5°. Where Can Galvanised Sheets Be Used? Galvanised corrugated sheets are highly versatile and can be used in both roofing and wall cladding applications. They're ideal for use in both commercial and industrial premises such as warehouses, as well as agricultural buildings. Many homeowners also use galvanised sheets on outbuildings such as garages or sheds. Why Choose Galvanised Corrugated Roofing Sheets? These galvanised roofing sheets are incredibly popular for a number of reasons: Crafted from hot-dipped galvanised steel for maximum durability and lifespan Available in two thicknesses to provide the ideal strength for your project Choice of lengths in increments of 100mm to minimise wastage Offer an incredible lifespan of up to 15 years on domestic and commercial projects Lightweight and therefore doesn't require extensive structural support Easy to install without the need for specialist tools Manufactured to meet or exceed CE EN 14782 requirements (Please note that due to the manufacturing process, there a tolerance of +/- 10mm on the length of these sheets.) Have More Questions About These Galvanised Corrugated Roofing

Sheets? If you have more questions about this roofing sheet, simply speak to our team online or by telephone. Our Customer Care Team will help you pick the ideal roofing materials for your project, all whilst making mega savings! We offer a full comprehensive range of metal roofing sheets in a variety of profiles. If you need ideas and inspiration for what's achievable using our sheets then check out our project gallery. Or for side cladding, see our metal wall cladding sheets. 26 Items Sort By Position Product Name Price Set Descending Direction Page 2To celebrate our 50th Anniversary, join us in taking a look back at how we have evolved and innovated as a company to become the UK's Leading Supplier of Roofing Sheets and Composite Decking.It all started on a driveway in rural Devon in 1972, when Leslie J Trescher began supplying Roofing Sheets to local agricultural communities across the South West.Originally named LJT Western, we quickly grew a reliable customer base and, with such a high demand in the first few years, this led to Leslie moving the business to a much larger site in Hatherleigh, Devon. We operated from Hatherleigh for an impressive 27 years, which proved to be a crucial part of the future of the business and our customers.Eight years after inception, in 1980, and now based in Hatherleigh, Devon, we successfully began delivering Roofing Sheets nationwide. This opened up the potential client base to a much broader area, which in turn increased the demand further for products.In 1982, Leslie's son, Lawrence Trescher, the now CEO and owner of Cladco, joined full-time and continued to expand the business further, eventually running the business single-handedly, from manufacturing to answering the phone and delivering the products.With a passion for providing a more bespoke service for our customers, this led to the purchase of our first roll forming machine. This paved the way for a new process of manufacturing Profiled Sheets in-house and marked a major milestone for our family-run business.
